

gko::log::Logger

```
graph BT; Record[gko::log::Record] --> Logger[gko::log::Logger];
```

A UML class diagram showing an inheritance relationship. The class `gko::log::Record` is the base class, represented by a light gray box. The class `gko::log::Logger` is the derived class, represented by a white box. A solid blue arrow points from the `Record` box to the `Logger` box, indicating that `Logger` inherits from `Record`.

gko::log::Record
