

gko::experimental::
mpi::CollectiveCommunicator

```
graph BT; A["gko::experimental::  
mpi::NeighborhoodCommunicator"] --> B["gko::experimental::  
mpi::CollectiveCommunicator"]
```

The diagram illustrates a relationship between two MPI communicator classes. A light gray box at the bottom represents the base class, `gko::experimental::mpi::NeighborhoodCommunicator`. A dark blue arrow points vertically from this box to a white box at the top, which represents the derived class, `gko::experimental::mpi::CollectiveCommunicator`. This indicates that `CollectiveCommunicator` inherits from or specializes `NeighborhoodCommunicator`.
