

gko::log::Logger

```
classDiagram
    class gko_log_Stream["gko::log::Stream< ValueType >"]
    class gko_log_Logger["gko::log::Logger"]
    gko_log_Stream --|> gko_log_Logger
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'gko::log::Stream< ValueType >'. A blue arrow points vertically upwards from this box to a white box at the top labeled 'gko::log::Logger'. This indicates that 'gko::log::Stream< ValueType >' is a base class or abstract class, and 'gko::log::Logger' is a derived class that inherits from it.

gko::log::Stream< ValueType >
